Experience

Mobile Developer, Germany

[Gymbud](#)

10/2023 - Current

- Spearheaded the development and maintenance of the Gymbud mobile application as a React Native developer, implementing a customized Google Maps integration to elevate the user experience and facilitate connections among gym users.
- Developed and implemented real-time chat functionality with Supabase, fostering seamless communication within the Gymbud platform and enhancing user engagement through the integration of messaging features.
- Integrated local and push notifications to keep users informed of new connection requests and incoming messages, enhancing user engagement and interaction.
- Implemented functionality for users to accept or reject incoming connection requests, enhancing networking capabilities to build a sense of community within the Gymbud app.

Software Developer, Nigeria

[Stackbuid](#)

03/2023 - 09/2023

- Redesigned and developed a visually appealing and user-friendly portfolio website for an agency using NextJs, Typescript and other web technologies.
- Deployed reCAPTCHA integration to enhance the website's security and protect against spam and malicious activities on contact forms which ensures a seamless user experience without compromising on usability.
- Executed on-page SEO strategies, including server side rendering, metatags, structured data, and optimized content, resulting in improved search engine visibility and higher organic traffic.
- Designed and developed cryptocurrency trading app for the company, leveraging React, Typescript and Ionic to create robust, scalable and type safe features including gift cards and cryptocurrency listing, transaction processing, and user authentication.

Frontend Developer, Nigeria

[Cloudbank](#)

02/2022 - 01/2023

- Created a user-friendly dashboard utilizing React to elevate the accessibility of user information.
- Resolved and debugged issues within the internal dashboard utilized by the company, ensuring seamless functionality and efficiency in internal operations.
- Played a key role in optimizing the performance of the internal dashboard by identifying and addressing bottlenecks, resulting in improved efficiency and responsiveness.

Projects

Meetmax

[Website](#) | [Repository](#)

- Designed and developed a social media application using Typescript, Nextjs, and Express, showcasing expertise in both frontend and backend development. Demo login -> email: pdev6373@gmail.com, password: peter-pan (In case of problem verifying email).
- Implemented internationalization (i18n) support, enabling the app to seamlessly serve users in more than 15 different languages, enhancing user accessibility and inclusivity.

Goalrush

[Website](#) | [Repository](#)

- Utilized Nextjs, Typescript, and Express to create the frontend and the backend of the livescore app, ensuring cross-browser compatibility, responsive design and great user experience.
- Incorporated Web Sockets to establish seamless communication between the frontend and backend, ensuring real-time data updates and a responsive user experience.

Education

Bachelor of Science

[Obafemi Awolowo University](#)

03/2019

- Major in Computer Science with Mathematics.
